Formulary Introduction

FORMULARY

The QualChoice Formulary, or Prescription Drug List, is a guide to available brand and generic drugs that are approved by the Food and Drug Administration (FDA) and covered through your prescription drug benefit. Generic drugs have the same active ingredients as their brand name counterparts and should be considered the first line of treatment. The FDA requires generics to be safe and work the same as brand name drugs. If there is no generic available, there may be more than one brand name drug to treat a condition. Preferred non-specialty brand name drugs are listed on Tier 2 to help identify brand drugs that are clinically appropriate, safe, and cost-effective treatment options, if a generic medication on the formulary is not suitable for your condition. Preferred specialty drugs are listed on Tier 4 while non-preferred specialty drugs are listed on Tier 5.

Please note, the Formulary is not meant to be a complete list of the drugs covered under your prescription drug benefit. Not all dosage forms or strengths of a drug may be covered. This list is periodically reviewed and updated and may be subject to change. Drugs may be added or removed, or additional requirements may be added in order to approve continued usage of a specific drug.

Specific prescription benefit plan designs may not cover certain products or categories, regardless of their appearance in this document. Please check your benefits for coverage limitations and your share of cost for your drugs.

Drug List Key:

Brand name drugs are listed in CAPS and generic drugs are listed in lower case. Drugs are covered under different cost-share tiers depending on your benefit.

Tier 1 – Lowest cost share tier for select drugs that offer the greatest value compared to other drugs used to treat similar conditions.

Tier 2 – Medium cost share tier that covers non-specialty brand name drugs that may be preferred compared to other drugs used to treat the same conditions.

Tier 3 – High cost share tier that covers higher cost (non-preferred) non-specialty brand name and non-preferred generic drugs. This tier will also apply to non-specialty drugs that are not on the Prescription Drug List but approval was granted due to formulary exception.

Tier 4 – Higher cost share tier that covers preferred specialty drugs (generic and brand) used to treat complex, chronic conditions that may require special handling, storage, or clinical management.

Tier 5 – Highest cost share tier that covers non-preferred specialty drugs (generic and brand)

P.O. Box 25610
Little Rock, AR 72221

used to treat complex, chronic conditions that may require specialty handling, storage, or clinical management. This tier will also apply to specialty drugs that are not on the Prescription Drug List, but approval was granted due to formulary exception.

Preventative Drugs – Drugs marked as preventative drugs are covered at no cost share (\$0) for certain plans. Please check your coverage documents for further information regarding coverage of these drugs.

Request for Formulary Exception

To request coverage for a drug not on the Prescription Drug List, your provider must complete and submit a Prior Authorization form (see [QualChoice.com](https://www.qualchoice.com) and click on the Pharmacy and Drug Formularies Page page). The PBM will respond within 24 hours of receipt of all necessary information for requests meeting the definition of urgent and within two (2) business days (not to exceed 72 hours) for non-urgent requests. If the request is disapproved, the notice of adverse benefit determination will contain a clear explanation of the specific reasons for the disapproval or, if the request was incomplete, the explanation will identify the missing material information necessary to complete the request.

Formulary Abbreviations:

Abbreviation	Term	What it means
AL	Age Limit	Some drugs are only covered for certain ages.
QL	Quantity Limit	Some drugs are only covered for a certain amount.
PA	Prior Authorization	Some drugs require prior approval by QualChoice before they will be covered. Your doctor must submit a request for prior authorization for review.
ST	Step Therapy	In some cases, you must first try certain drugs before QualChoice covers another drug for your medical condition.
NF	Non-formulary	This product is not covered unless you or your provider request an exception. Alternative medications are listed next to non-covered products.
PV	Preventative Drug	These products are preventative drugs which are covered at no cost share (\$0) for certain plans.
Rx/OTC	Prescription and OTC	These drugs are made in both prescription form and over the counter (OTC) form.
SP	Specialty Drug	These products are Specialty Drugs that may have special fill requirements.
